# KEIM LIGNOSIL®-VERANO – NATURAL GREYING OF WOODEN FACADES

KEIM Lignosil-Verano, a silicate based finish, produces a naturally beautiful, silver-grey patinated wood appearance from the first application on.

With a conscious decision to waive the protective function, a coating with KEIM Lignosil-Verano changes over time more and more into natural grey. Repainting is not necessary. The result will be the desired look of an elegant, greyed wood facade without further maintenance efforts.

KEIM Lignosil-Verano is very special. It is absolutely free of biocides and solvents and guarantees a naturally matt, colour stable appearance. The treated surfaces remain open to diffusion.

KEIM Lignosil-Verano is a particularly economical and sustainable system thanks to fast drying and very easy application.
